PBI Best Practice Prescribing: Opioids, Pain Management, and Addiction

*3 AMA PRA Category 1 Credits
Interactive Online Enduring Material*

Prescribers from any discipline will benefit from this course by learning the best practices in modern day prescribing from our expert faculty. This course educates learners on pain management and addiction, how to properly assess a patient's needs, and what individuals need to know about the Opioid Epidemic.

In this course, a participant will learn to:

- Implement safer, more effective treatment of pain with improved outcomes through the application of a comprehensive knowledge of the spectrum of pain medications
- Apply prescribing laws and regulations into clinical practice for the safe and effective use of opioids and controlled substances
- Produce and maintain medical records that document compliance with prescribing laws and document appropriate management and treatment of chronic pain
- Differentiate physical dependence on opioids from opioid addiction to minimize abuse potential and maximize pain management
